

CRETEPLUS

CEMENT GROUT BONDER

Creteplus is a powdered form of additives designed to enhance the adhesion strength and provides more flexibilities of normal cement mortar/grout. Creteplus has a very high water retention function that prolonged cement curing process that enhance the adhesion strength and provides best workability and high anti-sagging performanc. Creteplus is odourless, non-toxic and very user friendly.

- ✓ **Non-Toxic**
- ✓ **Cost Saving**
- ✓ **Anti Sagging**
- ✓ **Time Saving**
- ✓ **Easy Application**
- ✓ **Longer Opening Time**
- ✓ **Excellent Bonding Result**
- ✓ **No More Adhesive Cement**
- ✓ **Enhance Work Efficiency**

Suitable For

Tiling use on all kinds of tile materials, ceramic tiles, porcelain tiles, mosaic tiles and etc.

Tile Surface and Substrate Preparation

- All surface must be cleaned and free from dust, oil, laitance and all forms of contamination.

Application

- Apply cement / grout with Creteplus to floor or wall using a notched trowel..
- The recommended bed of cement / grout with Creteplus should be 3mm thick for wall tiling, 3-6mm for floor tiling and 2mm for brick laying.
- Allow cement / grout with Creteplus to set for 16 - 20 hours before grouting.

Grout Mixing Step

- Add in 1 pack (100gm) of Creteplus into 7 -8 litres of water.
- Add in 25kg of OPC.
- Stir until even

Recommendation / Remark

- Tile surface preparation: Apply single layer of Stella-Crete BA-888 to the rear side of the tile.
- Mixing the fine sand: Maximum 40% of fine sand is allowed into mixing

CRETEPLUS

Product Data

Packaging	100 gm / bag (100 bags/carton)
Appearance	White
Opening Time	1 Hour (at 25°C)
Pot Time	75 mins
Toxicity	Non-toxic
Fire Hazard	Non-Flammable
Shelf Life	18 Months
Storage	Store in protected areas where ambient temperature is between 50°F- 90°F (10 °C- 37°C).
Mixing Ratio	25 kg of cement to one bag of Creteplus (100gm)
