APPLICATION

USES

SUBSTRATES

WALLS
CONCRETE, BRICK
BLOCK
FLOOR
STONE, POROUS
UNGLAZED TILES

DESCRIPTION

Prime Seal is a water based penetrating sealer for use on porous masonry surfaces, porous tiles, grout, brick, concrete and natural porous stones.

USES

Water repellent sealer for grout, concrete, natural porous stones and applying to porous tiles before grouting or applying **Terra Guard** wax system.

FEATURES

- Does not change appearance
- Suitable for internal and external application
- Simple to apply
- Suitable for pre-sealing terracotta
- Reduces staining
- Water based

COVERAGE

1 L covers approx. 6-10m². 2-3 coats required depending on porosity.

SPECIFICATION

The sealer shall be a water based, penetrating sealer such as Prime Seal, manufactured by Construction Chemicals and shall be applied according to the manufacturer's application instructions.

SURFACE PREPARATION

Make sure surface is clean, dry and has no previous sealer. **Always apply to a test area before commencing to ensure suitability.**

APPLICATION

Prime Seal can be applied easily with a brush, spray or roller. Apply one coat taking care to avoid puddling. **Do not allow the sealer to dry on the surface**, any material not absorbed after 5 minutes should be wiped off with paper towels or clean rags. For high porosity surfaces a second or even third application may be necessary immediately after the previous coat. For best results apply until surface will no longer absorb the material, always ensuring excess is wiped off. Allow 24 hours to cure. Stain reduction should be tested with substances common to the area. Avoid contact with glass and metals.

SAFETY

Prime Seal is poisonous if swallowed, avoid contact with skin and eyes. Keep out of the reach of children. Wear approved gloves and eye protection.

FIRST AID

If swallowed contact a doctor. Do not induce vomiting. If in eyes flood with water for about 15 minutes and seek medical advice.

SHELF LIFE

2 Years.
